

Save for later

Save your balance for when you need it

What is it?

“Save for later” is an optional feature that allows you to keep the balance of your food and transportation benefits that you don't use during the month. That way, you don't lose a single euro and can make the most of your benefits when you really need them.

How does it work?

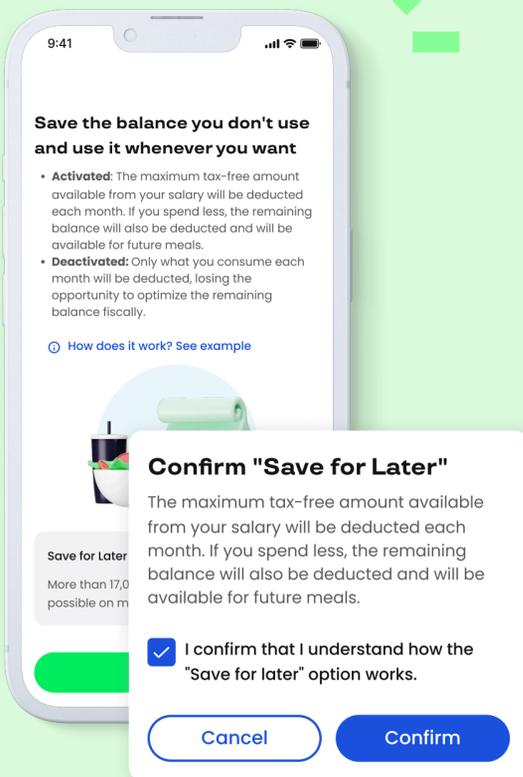

Option enabled

Each month, the maximum amount exempt from income tax will be automatically deducted from your paycheck. If you don't spend all of that balance, the unused amount is automatically saved and remains available for future use.

Option disabled

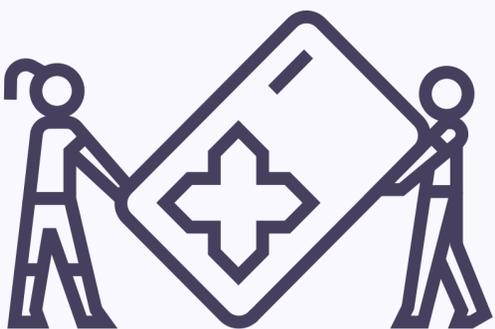

Only the amount you spend that month will be deducted from your paycheck. If you don't use all of your balance, you'll be missing out on an opportunity to optimize your benefit for tax purposes.

Important: this option is available for both meal and transportation benefits

A practical example

Each month, you have a limit of €220. But this month you only spend €100. The result? The remaining €120 will be saved and you can use it later. You can activate or deactivate this option at any time from your Cobee by Pluxee app.

Why activate it?

- **✓ You don't lose any balance:** what you don't spend is saved.
- **✓ More flexibility:** use your benefit whenever you want.
- **✓ Easy to manage:** you choose how and when to use it from the app.
